## FUND DESCRIPTION

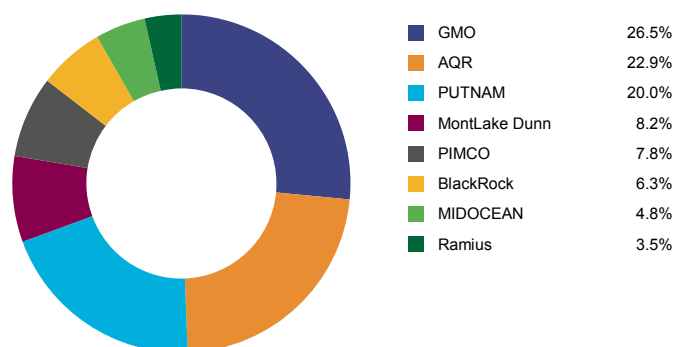

The balanced portfolio invests primarily in growth assets such as equities, property and alternatives. This includes developed market equities, Irish and UK property and a range of alternative investment managers and asset classes. In addition, there are smaller holdings of government and corporate bonds to diversify and help reduce risk within the portfolio. This portfolio is suitable for investors seeking relatively higher returns on their investments, and who are comfortable accepting a relatively higher level of risk and understand that capital values and returns may fluctuate down as well as up, especially in the short term.
