The assets in this fund may be used for the purposes of securities lending in order to earn an additional return for the fund. While securities lending increases the level of risk within the fund it also provides an opportunity to increase the investment return. External asset managers may change over time. Underlying funds or investments may be subject to incentive fees. Non euro currency exposures may be fully or partly hedged back to euro to reduce foreign currency risk. This fund may borrow to invest which increases both the risk and opportunity for return.
