FUND DESCRIPTION

Currently this fund invests largely in long-term Eurozone government bonds and cash. The balance of the fund may have direct or indirect exposure to global interest rate markets. The aim of this fund is to pay for an annuity when you retire. This fund should broadly follow the long-term changes in annuity prices due to interest rates, i.e. if long-term interest rates fall, the value of this fund will increase to roughly compensate for the rise in annuity prices. Long-term interest rates are just one of the main factors that determine the cost of an annuity and there will be times when the fund will not track annuity prices closely and no guarantee can be given in relation to such movements.

Warning: If you invest in this product you may lose some or all of the money you invest.
