## FUND DESCRIPTION

This fund will normally have large asset allocations to cash and fixed interest investments. The majority of fixed interest investments will be low risk government and corporate bonds. To provide diversification, the remaining assets are invested in equities, property and alternatives. The equity holding will normally invest in developed markets, with small exposures to other regions or sectors. Investors in this fund are looking for modest investment returns over the longer term and are prepared to accept some investment risk to achieve this and the possibility of capital loss particularly in the short term. In addition, the Dynamic Share to Cash (DSC) model will operate on a portion of the fund.

**Warning: If you invest in this product you may lose some or all of the money you invest.**

## ALTERNATIVES LISTED BY MANAGER

The assets in this fund may be used for the purposes of securities lending in order to earn an additional return for the fund. While securities lending increases the level of risk within the fund it also provides an opportunity to increase the investment return. External asset managers may change over time. Underlying funds or investments may be subject to incentive fees. High Yield Bonds are sub-advised by an external manager. This fund may borrow to invest which increases both the risk and opportunity for return.

**This fund is provided by Irish Life Assurance plc and is managed by Irish Life Investment Managers Limited. It is developed together with Wealth Alliance to meet the needs of a specific client risk profile.**

**Warning: This fund may be affected by changes in currency exchange rates.**
