Notes on Bullet Commission Options

1. All examples above assume investment in the Consensus Fund. Investment in a different fund could lead to a higher Annual Management Charge.
2. Commission term is calculated based on a maximum Normal Retirement Age (NRA) of 60.
3. The allocation rates above may increase: annual contributions from €5,000 to below €10,000 receive an additional 0.75% investment allocation while contributions of €10,000 plus receive an additional 1.5% investment allocation.
4. The timing of the 4 bullet payments is based on a pension persistency rate of 87%. If your pension persistency is lower than this at the end of the second year of a policy written under the New Commission Deal, the remaining 3 bullet payments will still be paid but will each be deferred by a year (i.e. they will be paid in years 4, 6 & 8). Similarly, the fund based renewal commission will also be deferred by a year, i.e. it will be paid from the start of year 10.
