## ASSET ALLOCATION

## FUND DESCRIPTION

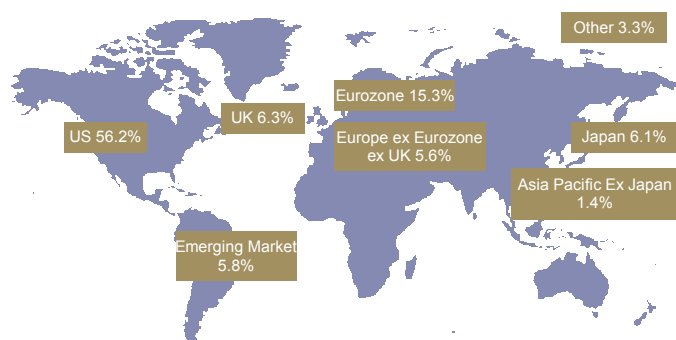

This fund holds a mix of assets, but invests primarily in cash and bonds. The bond holdings will normally be diversified across different sectors such as government, corporate and emerging market fixed interest investments. Smaller allocations will be made in global equities and other assets such as alternative investments. Investors in this fund accept that capital growth may be low in return for lower risk of capital loss. The fund uses an active asset allocation strategy to move money between shares and cash.

**Warning: If you invest in this product you may lose some or all of the money you invest.**

The assets in this fund may be used for the purposes of securities lending in order to earn an additional return for the fund. While securities lending increases the level of risk within the fund it also provides an opportunity to increase the investment return. External asset managers may change over time. Underlying funds or investments may be subject to incentive fees. This fund may borrow to invest which increases both the risk and opportunity for return.

This fund is provided by Irish Life Assurance plc and is managed by Irish Life Investment Managers Limited. It is developed together with FDC to meet the needs of a specific client risk profile.
